STEAM @ TOPE LEARNERS USE THEIR SUPERHUMAN POWERS! We are everyday heroes!

GOOD MORNING STEAM @ TOPE FAMILY Take a moment to breathe in, breathe out and settle in for a few minutes.

You all have been learning ways to use your super human growth mindset and neuroplasticity powers to become an everyday hero.

Yesterday, we looked at Alex who appeared on Ellen to discuss his invention--The Ability App. Alex saw someone with a disability struggling and decided he wanted to make a difference at the young age of 10! Right now, we have 2nd, 3rd, 4th and 5th graders working to make a difference in our community by capturing Tope's history, by protecting bats, by protecting recreational spaces and by fostering a sense of belongingness here at Tope. We can't wait to see your solutions roll out!

Today, you are going to learn about a girl who is making a difference one garden at a time. She truly is taking action and showing kindness, compassion and concern for others.

As you walk down your path of awesome—Make sure you are using your superhuman powers that an everyday hero has, and--- Take action and be a person who makes a difference!
